

Oil Analysis

What you don't know could hurt your engine. Oil analysis will help you get the most out of your oil program, detect the early warning signs of hidden problems and prevent costly repairs down the road.

- **Get the facts** – know what is going on inside your engine, gearbox and transmission.
- **Save maintenance costs** – discover and correct hidden problems before they cost you down time.
- **Increase resale value** – reports provide history of maintenance for potential buyers.
- **Done in minutes** – on-site computerized oil analyzers in all Speedco locations conduct 16 different tests in about 5 minutes.
- **What oil analysis looks for and tells you:**
 - metal wear** – there will always be some metals in oil but high levels alert you to problems such as piston, cylinder and ring wear.
 - Contaminants** – coolant, dirt, fuel, soot and water may be an early warning of coolant leaks, injector problems or high operating temperatures.
 - Oil properties** – Oxidation, viscosity and Total Base Number (TBN) indicate oil life and if it's time for an oil change.

Information you need to
predict, prevent and plan
for optimum truck or fleet
performance and value

No Slowing Down.

Whether you are an independent trucker or managing a fleet of trucks, **LubeTrak** enhances your fluid management program with:

- **Increased productivity of maintenance** – improves and assesses maintenance objectives.
- **Reduced maintenance costs** – reduces expensive equipment downtime.
- **Consistently higher resale value** – reports provide history of maintenance for potential buyers.
- **Definite competitive advantage** – simple oil analysis is not enough. You need all the facts all the time.
- **Increased machinery lifespan** – ensure equipment is running in peak condition.
- **Global 24/7 access** – provide accessibility to world-class maintenance solutions any time from anywhere.

LubeTrak is the most complete Web-based lube maintenance tool on the market. It puts you in complete control over your equipments' condition, sampling schedules and management reporting, all from your Web browser. Spot trends, track down poor maintenance practices and graph any unit or component condition.

State of the art eOil analysis.

Critical results are emailed that day and highlighted for immediate action. You will be empowered with the ability to evaluate and make informed decisions regardless of the data source.

Online ordering.

Use **LubeTrak** as your virtual lab to order sample kits and testing on-line as well as view order history and status.

Account management.

Manage all of your account information from a single customizable view.

Equipment management.

Register equipment on-line and access all components from a single view.

Management reports.

Generate detailed management summary reports for equipment by location, by component, by condition and more!

- Complete fluid management solutions
- Comprehensive on-line maintenance tool
- No web-based software to install
- Customizable program user views
- Global integration capability

Ask your Speedco location about the **LubeTrak** solution today.

Customizable program user views. Manage equipment in a single view.

Detailed sample analysis reporting. Detailed management reports.

Side-by-side regression analysis. Multi-line graphing.
